Introduction:

In today's digital era, email communication has become a vital tool for businesses and individuals alike. With over 4 billion people using email regularly, the number of emails sent and received every day has risen to 306 billion. Despite its widespread usage, misdirected emails still remain a significant problem, with 58% of people reporting that they have sent an email to the wrong person while at work. This simple human error can result in disastrous consequences, including financial losses, damage to a company's reputation, and even job loss.

Problem Statement:

Misdirected emails can lead to serious data breaches, especially when dealing with confidential or sensitive information. With the advent of various privacy laws and regulations such as GDPR and US privacy laws, businesses are now at risk of hefty fines, amounting to 2-4% of their annual turnover, for just one such breach. With increasing reliance on email communication, it's essential to have proper safeguards in place to protect sensitive information from accidental exposure.

Solution:

ConfirmSend is the ultimate solution to prevent misdirected emails and confidential data loss in Microsoft Outlook. It's a Microsoft Outlook add-in that affirms your GDPR compliance and strengthens your cyber security stance. ConfirmSend acts as a safeguard between the user and the final commit to sending an email or appointment, providing prompts before sending each email or calendar appointment. This way, you can quickly confirm the recipient, attachment, or appointment time before sending, reducing the risk of misdirected emails and safeguarding your confidential data.

Key Features:

- Prompts before sending each email or calendar appointment
- Confirms the recipient, attachment, and appointment time
- Strengthens cyber security and GDPR compliance
- Widely used by high-profile Criminal Law firms, Investment bankers, Accountants, and Finance/HR Departments
- An offline piece of software that does not collect or interrogate data

Benefits: ConfirmSend offers a range of benefits to its users, including:

- Reduces the risk of misdirected emails and confidential data loss
- Avoids costly fines and mandatory auditing from regulators
- Provides peace of mind while handling sensitive information
- Enhances cyber security and data protection
- Increases overall efficiency and productivity

Conclusion:

In conclusion, ConfirmSend is the ultimate solution to prevent misdirected emails and confidential data loss in Microsoft Outlook. It's an essential tool for any financial, legal, or medical institute that utilizes Microsoft Outlook for email communication. With its key features and benefits, ConfirmSend provides a simple yet effective solution to safeguard sensitive information and reduce the risk of misdirected emails. The cost of ConfirmSend is miniscule in comparison to the possible fines a company could face. Signup today and handle your private client data with confidence.
